RE: Stack Test Protocols

Dear Dan:

Enclosed you will find protocols for the stack testing which will be performed during May, 2002, as detailed in my correspondence to you dated May 2, 2002.

The protocol labeled Project No. M02-066-02 is for AQD #17 (Calciners 1 and 2). This protocol details the NO_x emissions testing that will be conducted on the source to show compliance, as required annually per Operating Permit 30-126. This testing is scheduled for May 14, 2002.

The protocol labeled Project M02-066-01 is for AQD #82 (Dryer #6). This protocol details NO_x emissions testing which will be conducted on the source. This testing will serve two purposes: to show compliance as required annually per Operating Permit 30-126, and to show compliance with existing NO_x emission limits at an increased production rate as allowed by Temporary Permit Waiver AP-RU2 dated April 12, 2002. This testing is scheduled for May 16, 2002.

Details of the Relative Accuracy Test Audit (RATA) are found in the protocol labeled Project No. M02-066-03. The RATA will be performed on AQD #18 and #19, as required annually per Operating Permit 30-126. This testing is scheduled for May 20 and 21, 2002.

If you have any questions concerning the protocols, feel free to contact me at (307) 872-6571.

Respectfully submitted,

Dolly A. Potter
Environmental Services Supervisor
